

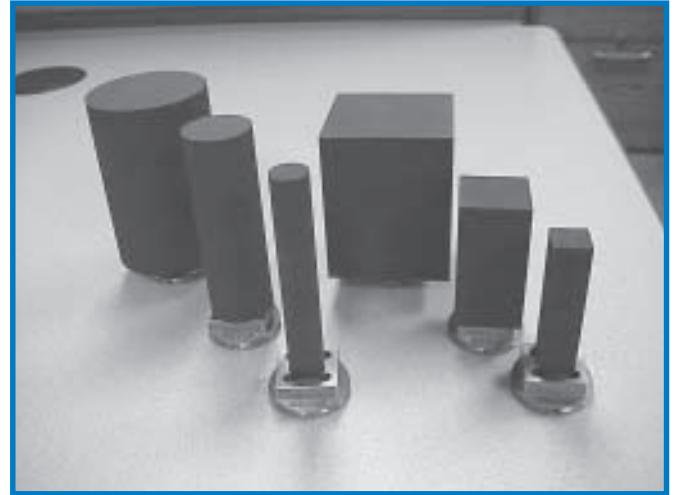

Graphite Blanks Pre-mounted on EROWA® ITS Compact Holders

If you're using the EROWA ITS Compact Combi tooling system on your sinking EDM machines, here's a great way to save time, *and money*, preparing, setting-up and machining your electrodes: round and square POCO EDM-3 graphite blanks pre-mounted to EROWA ITS Compact Holders.

These pre-mounted blanks quickly attach to your EROWA ITS Compact System or ITS Compact Combi System, and are then ready for machining. Competitive pricing makes these pre-mounted blanks less costly than spending your time preparing and mounting the blanks yourself (based on current shop labor rates).

Pre-mounted blanks are furnished at nominal dimensions. The holders are either glued or attached with socket head capscrews, depending on style and size. Unmounted blanks are also available, which are prepared for Compact holders with tapped screw mounting holes, or with a raised boss suitable for glueing; again, depending on style and size.

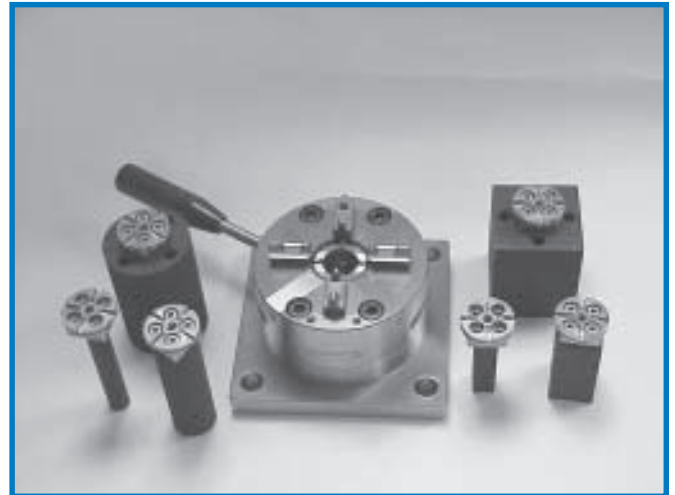

Specials – need different sizes, or a different grade of graphite? No problem; we can easily make these to order to your specifications. Just call us for a competitive quotation.

Pre-mounted graphite blanks on EROWA ITS Compact Holders

POCO EDM-3 Graphite Blanks Pre-mounted on EROWA ITS Compact Holders

Catalog No.	Description <i>(pre-mounted on ITS Compact Holders)</i>
GS5100	1/2" Dia. x 3" Long Set of 12
